### Website and Cloud Security Assessment

CT Defense has conducted a Web Application Security Assessment and Cloud Configuration Review to evaluate the potential risks that a real-life, targeted attacker could pose to the security and integrity of the company.

The security team has categorized the findings as **low-risk**, having successfully remediated all high-risk vulnerabilities. During the subsequent retesting phase, no new critical or high-risk issues were identified. As a result, the assessment confirms that environment has no unmitigated risks.

The security assessment was performed during the period between May 31st, 2024 and June 17th, 2024.

We are pleased to confirm the robustness and integrity of the in-scope assets. The environment has been carefully evaluated and found to meet the highest standards of security, and we are glad to designate it as:
